mobilizing climate science

A series of events highlighting the work of the IPCC on its 30th anniversary

#All4TheGreen
2018 marks the 30th anniversary of the Intergovernmental Panel on Climate Change (IPCC), the international body for assessing the science related to climate change.

“All4TheGreen – Mobilizing Climate Science - A series of events highlighting the work of the IPCC on its 30th Anniversary” aims to celebrate IPCC’s outstanding contribution to a comprehensive understanding of our planet’s climate and the changes that have been observed and project future climate change.

The event in celebration of the IPCC’s 30th Anniversary focuses attention on the need to increase awareness, make the strongest links possible between the science and the evidence we increasingly see before us, and support the climate-smart solutions needed for our future.
